Tired of running in the dark?

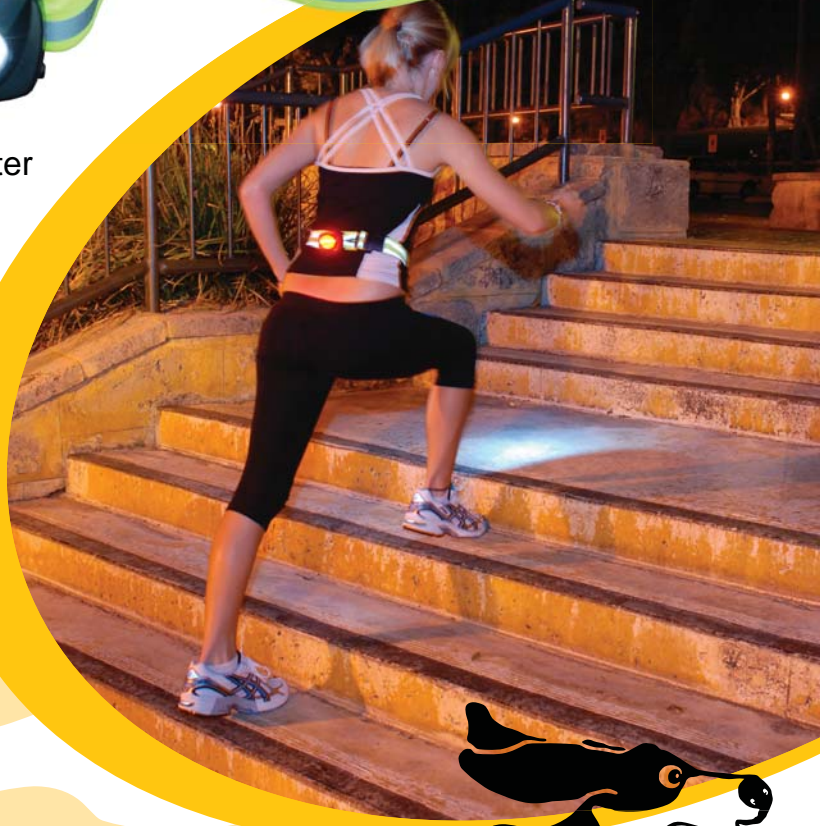

# see and be seen

There's no point keeping superfit this winter only to be knocked over by a bus!

See and be seen with **NITERunner**

- Three brightness levels on both red and white lamps allow you to set your visibility level for each run.
- Weighs less than 150 grams including batteries (approx. 100hrs using alkaline batteries, 6x AAA batteries included).
- Water resistant rubber gaskets incorporated into battery compartment with sealed switch.
- Unlike a head mounted light the waist mounted NITERunner bounces less and casts a bright pool of light focused where your next footfall will be.
- Wide 40mm belt is comfortable and less prone to rolling over.
- The belt is made from high visibility elasticated webbing with two highly reflective printed strips to give extra safety at night even if the lamps are not switched on.

**\$59.00** (AUS)

You can purchase via our shop on [ebay.com.au](http://ebay.com.au) or simply enquire by email to [niterunner@three.com.au](mailto:niterunner@three.com.au). Postage is \$4.20 to anywhere in Australia. New Zealand and overseas orders are also welcome.
